

# FOR LESS SHIFT IN YOUR SHIPMENTS.

G-Force™ Fill Components are designed for filling voids, from pallet underhang to voids in transportation equipment.

They're strong, lightweight protection that's easy to install.

Fill products are ideal for stabilizing cartons, bulk bins, bags, other containers, and are available in a wide range of standard sizes.

PRODUCT	IMAGE	DESCRIPTION
G-Force Drop-Down Void Fillers		Excellent lateral void fillers for center or sidewall voids. Ship and store knocked down, saving cost and space. Available in many standard sizes.
G-Force Dual-Drop Void Fillers		Use to brace center-loaded units for correct axle weights. Ship and store knocked down.
G-Force Box-Style Void Fillers		Use in center voids to prevent lateral shift. Good for bracing non-rectangular units, such as bulk bags, pails, etc. Feature closed sides for easy use with bagged products.
G-Force Fan-Fold Void Fillers		Side fillers for products loaded away from walls. Ship and store knocked down.
G-Force Honeycomb Panels		Panel void fillers for filling lengthwise or lateral voids and pallet underhang, whether in boxcars, trailers, or containers. Often used adjacent to reduce voids for optimum Air Bag performance.
G-Force M-Type Space Fillers		Fill large, lengthwise void space in the forward part of trailers for correct weight distribution.
G-Force Lock'n Load® Brace Fillers		For filling lengthwise voids in shipments of panel products and other commodities. Very strong and light. AAR-approved.

Down River™ G-Force Fill Components brace your shipments for correct weight distribution and protection against shifting in transit. Our Down River Load Securement Specialists can train your employees how best to use them.

Fill components are just part of the many product groupings offered by Down River. Ask your Down River Load Securement Specialist for information on our full line and our unique custom-design capabilities.

Protect your products and your profits.

\*Most standard widths and lengths are available in 12" increments.  
 \*\*Most standard thicknesses are available in 1" increments.  
 \*\*\*Widths are sized to application.  
 \*\*\*\*For voids larger than standard thicknesses, multiple pieces can be used.
