<tbody>
<tr>
<td>G-Force® Drop-Down Void Fillers</td>
<td><img src="image1" alt="Image" /></td>
<td>Excellent lateral void filler for center or sidewall voids. Ship and store knocked down, saving cost and space. Available in many standard sizes.</td>
</tr>
<tr>
<td>G-Force Air Bags</td>
<td><img src="image2" alt="Image" /></td>
<td>Brace your load, creating a bulkhead for very strong and effective load restraint. Available in vinyl, levels 1-5 paper (2-8 ply); and levels 3-5 polywoven.</td>
</tr>
<tr>
<td>G-Force Honeycomb Panels</td>
<td><img src="image3" alt="Image" /></td>
<td>Use to fill lengthwise voids, pallet underhangs, or with Air Bags. Reinforce loads from shifting due to lengthwise impacts.</td>
</tr>
<tr>
<td>G-Force Air Bags</td>
<td><img src="image4" alt="Image" /></td>
<td>Prevent lengthwise shifting of uneven loads. Securely brace products at “step-ups” and “step-downs” in loading patterns. Built with lumber reinforcement. Lightweight yet very strong. Tailor-sized to the application, so no cutting required.</td>
</tr>
<tr>
<td>G-Force Lock’n Load® Brace Fillers</td>
<td><img src="image5" alt="Image" /></td>
<td>For filling lengthwise voids in shipments of panel products and other commodities. Very strong and light. AAR-approved.</td>
</tr>
<tr>
<td>G-Force Filler-Blocks</td>
<td><img src="image6" alt="Image" /></td>
<td>Filler-Blocks fill the cubic space of a pallet load of your product without the weight. Used to increase shipping capacity beyond blocks of 4 pallet loads in boxcars and to spread weight distribution in intermodal shipments.</td>
</tr>

Configure your solution.

Work with your Down River® Load Securement Specialist to determine which products suit your needs best. If our products don’t meet your exact needs, our engineers can custom-design a solution for you. We have facilities and load-securement experts strategically located across North America, so we’re never far away.

Better thinking for inside your boxcars.

Down River® offers the products, services, and experience necessary to design a load-securement system specifically for your needs.
Why product protection in boxcars is important.

When it comes to properly securing unitized goods in boxcars, there are no second chances. Slack action, impacts, and load shifts during transit can result in more than just damaged product.

- Customer dissatisfaction
- Rejected loads
- Added costs for having to replace, salvage, or dispose of product
- Possible customer penalties and fines
- Risk of employee injury
- Lost sales

Boxcars have their own set of unique challenges for shippers. Our Down River Load Securement Specialists have the products, experience, and knowledge to design a securement system for your specific needs and products.

Selected load patterns for in-transit protection of unitized goods in boxcars.

You have too much invested in your shipments to risk damaging them during transit. Trust Down River G-Force Load Securement Innovations to help your products arrive the same way they left.

G-Force Load Securement Innovations offer:

- Engineered solutions to help reduce in-transit damage.
- On-site load-securement evaluations.
- Easy-to-install, standard and custom-designed products.
- Materials that are reusable, recyclable, and environmentally friendly.
- Employee training and continuing education available by G-Force Specialists.

G-Force Air Bags
G-Force Wood-Kor® Bulkhead Panels
G-Force Filler-Blocks
G-Force Honeycomb Panels
G-Force Drop-Down Void Fillers
