<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>G-Force® Layer Separators</td>
<td></td>
<td>Stronger than corrugated products, yet lighter than plywood. AAR-approved for hazardous goods. Pre-cut in several sizes to fit your shipments.</td>
</tr>
<tr>
<td>G-Force Separators</td>
<td></td>
<td>Ideal for preventing drum-to-drum abrasion and for auto-filling applications. Available in various configurations.</td>
</tr>
<tr>
<td>G-Force Air Bags</td>
<td></td>
<td>Brace your load, creating a bulkhead for very strong and effective load restraint. Available in vinyl, levels 1-5 paper (2-8 ply), and levels 3-5 polywoven.</td>
</tr>
<tr>
<td>G-Force Protection Sleeves</td>
<td></td>
<td>Used on every other drum to maintain quality condition by preventing drum abrasion. Lightweight and easy to use.</td>
</tr>
<tr>
<td>G-Force Ty-Gard 2000® Fabric Load Restraint</td>
<td></td>
<td>Extremely efficient. Each roll contains enough material for up to seven shipments. AAR-approved for use with hazardous materials and in intermodal loads.</td>
</tr>
<tr>
<td>GatorSTRAP®, GatorLASH®</td>
<td></td>
<td>High-strength woven polyester strapping delivers high-performance securement with ease-of-use and safety. AAR-approved.</td>
</tr>
<tr>
<td>G-Force Wood-Kor® Bulkhead Panels</td>
<td></td>
<td>Securely brace products at “step-ups” and “step-downs” in loading patterns. Lightweight yet very strong. Tailor-sized to the application, no cutting required.</td>
</tr>
<tr>
<td>G-Force Unit Strapping MakoSTRAP® &amp; ZippSTRAP®</td>
<td></td>
<td>All-weather bonded polyester cord strapping and buckle deliver high-performance unitization with ease-of-use and safety.</td>
</tr>

No more rock and roll for your drums.
Down River® offers the products, services, and experience necessary to design a drum-securement system specifically for your needs.
G-Force®. Not just great products, but great expertise, too.

With more products protecting shipments for more industries, G-Force Load Securement Innovations can help your bottom line. They’re designed and implemented by a highly trained team of experts to help you best secure your shipments for any mode.

Drum protection made easy.

When it comes to properly securing drums, there are no second chances. Slack action, impacts, and load shifts during transit can result in more than just damaged product.

- Customer dissatisfaction
- Rejected loads
- Added costs for having to replace, salvage, or dispose of product
- Possible customer penalties and fines
- Risk of employee injury
- Lost sales

Down River® has been providing freight bracing products and services for more than 40 years, and in that time we’ve learned a thing or two about how best to secure drums for transit. Our Down River Load Securement Specialists have the products, experience, and knowledge to design a drum-securement system for your specific needs.

Selected load patterns for commodities in drums.

G-Force Protection Sleeves
G-Force M-Type Space Fillers
G-Force Air Bags

Over-the-Road Trailers
Ensure safe and secure weight distribution of your products.

20’ Intermodal Containers
Restrain your products safely and securely with G-Force products for HAZMAT or non-HAZMAT commodities in drums.

G-Force Load Securement Innovations offer:

- Engineered solutions to help reduce in-transit damage.
- On-site load-securement evaluations.
- Easy-to-install, standard and custom-designed products.
- Materials that are reusable, recyclable, and environmentally friendly.
- Employee training and continuing education available by G-Force Specialists.

You have too much invested in your drums to risk damage during transit. Trust Down River G-Force Load Securement Innovations to help your products arrive the same way they left.
